

The Future of Audio

TEAMCONNECT INTELLIGENT SPEAKER

Meet Your Teams

The Intelligent Speaker Optimized
for Microsoft Teams Rooms

TeamConnect Intelligent Speaker

The TeamConnect Intelligent Speaker is the ultimate audio solution optimized for small Microsoft Teams Rooms. It is designed specifically to give teams a whole new way to collaborate in hybrid meetings: smart, focused, inclusive and as if everyone is in one place. Intelligent solutions such as the integrated Cortana voice recognition software make operation on the product itself obsolete. Automatic meeting notes make an inclusive meeting experience possible for remote and hard-of-hearing participants.

Efficient and Smart Meetings

Installation and connection have never been easier. You can fully utilize the speakerphone right away after installing it in your **Microsoft Teams Rooms**. With this immersive and user-friendly setup, there is no audio preparation, no additional devices like a laptop or tablet and no notes or a pen needed to make it work seamlessly. The speaker will also **transcribe** the meeting **in real-time** while identifying up to **10 different voices** in the room.

Touchless and Intelligent Use

Collaboration is key with the TeamConnect Intelligent Speaker. Microsoft Teams users can join Microsoft Teams instantly and without touch. Fumbling around with conference room equipment, taking precious time out of your day to troubleshoot technical difficulties are all problems of the past. The speakerphone understands voice commands and responds seamlessly to them. The **Microsoft Cortana voice intelligence** allows users to control the mic verbally for video conferencing and team meetings.

Collaboration Without Limitations

For remote participants or those who are hard of hearing, **live transcription** gives them a new seat at the table for immersive and supportive collaboration - all without any drawbacks or limitations. The corresponding **transcription documents** are available immediately after the meeting. Microsoft Teams Rooms are now a much more collaborative environment with the TeamConnect Intelligent Speaker.

State-of-the-art Audio Quality

Sennheiser and Microsoft have taken the Microsoft Teams Rooms experience to new heights by providing a powerful and intelligent product that allows Microsoft Teams users to take advantage of a new kind of audio quality. With its powerful speaker and **7 beamforming microphones** the TeamConnect Intelligent Speaker covers a **3,5 - meter radius** and ensures perfect speech intelligibility in every meeting with excellent **double-talk performance**.

Specifications

TeamConnect Intelligent Speaker

Dimensions	128.3 x 56.3 mm
Weight	469 g
